Rules and Regulations

1. Definitions

- A. “**Barrel**” as used herein refers to forty-two (42) U.S. gallons.
- B. “**Petroleum Products**” as used herein refers to gasoline, petroleum fuel oil distillate, jet fuel, and/or kerosene.
- C. “**Carrier**” as used herein refers to Phillips 66 Carrier LLC
- D. “**Tender**” means an offer by a Shipper to a Carrier of a stated quantity of Petroleum Products from the specified origin to a specified destination or destinations pursuant to the terms of this tariff.

2. Specifications Required

Petroleum Products will be accepted for transportation at such times as Petroleum Products of same quality and specifications are currently being transported from receiving point to destination. Carrier will have no obligation to accept, gather, transport, or deliver any Petroleum Products that do not meet Carrier’s pipeline product specifications, as currently in effect, without Carrier’s written approval.

All additives and inhibitors to be included in shippers’ Petroleum Products must first be approved by the Carrier before such Petroleum Products will be accepted for transportation.

- A current copy of the Seminole Pipeline specifications document titled “Seminole Pipeline” Effective May 4, 2025 may be obtained on request from the compiled by person listed on the title page or on the Phillips 66 Carrier LLC website: <https://www.phillips66.com/midstream/tariffs>
- Carrier reserves the right to require Shipper to demonstrate that Petroleum Products offered for transportation meet required specifications as prescribed in the Seminole Pipeline Specifications document.
- In the event Shipper Tenders off-specification Petroleum Products, Carrier may accept such Petroleum Products if Carrier determines, in its sole discretion, that the quality of the off-specification Petroleum Products, when commingled in its common stream, will nonetheless meet the Seminole Pipeline Product Specifications, as currently in effect, or Carrier may provide a waiver of such specifications at Carrier’s sole discretion. If Carrier decides to not accept the off-specification Petroleum Products, Carrier may exclude Shipper from further entry into the System until such time as Shipper returns the quality of Petroleum Products to a level satisfactory to Carrier in accordance with the Seminole Pipeline Specifications.
- Shipper shall be responsible for all reasonable expenses incurred by Carrier resulting from Carrier’s receipt of any Petroleum Products that do not comply with the Seminole Pipeline Specifications document.

3. Minimum Shipment

Shipments of Petroleum Products will be accepted for transportation in quantities of not less than 10,000 Barrels for any one commodity of quality and specifications as described herein at one point or origin from one shipper. Carrier will make deliveries to destination in quantities of not less than 5,000 Barrels for any one product.

4. Proration of Pipeline Capacity

If total volume for shipment during any one month exceeds the pipeline delivery capacity for such month, Petroleum Products offered by each shipper for transportation will be transported in such quantities and at such times to the limit of capacity so as to avoid discrimination among shippers. The proration policy for Seminole Pipeline dated 9/29/2023 is available by contacting the individual listed under the “Compiled By” heading on the title page of the tariff or on the Carrier’s website:

<https://www.phillips66.com/midstream/tariffs> (“Phillips 66 Carrier LLC - Seminole Pipeline System”)

5. Pipeage Contracts Required

Separate pipeage contracts in accord with this tariff and these regulations covering further details may be required of the proposed shipper before any duty of transportation shall arise.

6. Acceptance – Free From Liens and Charges

Carrier may decline to accept Petroleum Products for transportation which are involved in litigation or which are not free from liens or charges.

7. Gauging, Testing, and Deductions

Twenty-four (24) hours prior to acceptance of Petroleum Products for transportation, Carrier may test such Petroleum Products and may require from shipper a certificate setting forth in detail the specifications of each shipment of Petroleum Products which must indicate all additives and inhibitors included.

Where shipment originates over system of a connecting pipeline, Carrier may require certificate setting forth in detail the specifications of each shipment of Petroleum Products to be identified by batch number from the connecting pipeline twenty-four (24) hours prior to delivery of the shipment to Carrier. Quantities of Petroleum Products accepted for transportation and quantities delivered to shipper will be gauged or metered at Carrier's option. Both the Carrier and the shipper will have the privilege of witnessing gauges, meter readings, and tests to which shipments of Petroleum Products are subjected.

A Tender deduction of [U]1/10 percent by volume (or the financial equivalent) will be made on the quantity of Petroleum Products accepted for transportation.

8. Temperature Corrections

In measuring the quantity of Petroleum Products received and delivered, correction shall be made from volume at actual or observed temperature to volume at 60° Fahrenheit.

9. Identity of Shipment

Petroleum Products will be accepted for transportation hereunder only on condition that same shall be subject to such changes in gravity, color, quality, or characteristics while in transit as may result from its mixture with other Petroleum Products. The Carrier may inject corrosion inhibitor compound in the product to be transported, and the shipper will accept deliveries of shipments at destinations containing portions of the corrosion inhibitor compound.

Because of the impracticability of maintaining the exact identity of Petroleum Products accepted for transportation, Carrier reserves the right to substitute for delivery a like volume of the same kind and quality.

10. Origin and Destination Facilities

Carrier will provide no storage facilities at origin and at the Sheridan destination station. Petroleum Products will be accepted for transportation only when shipper has provided equipment and facilities satisfactory to the Carrier for delivery of such shipments to Carrier's destination station at a pumping rate equal to Carrier's current rate of pumping and for receiving same without delay upon arrival at destination.

11. Transportation Charges

Transportation charges accruing on any shipment of Petroleum Products will be based on rates named herein on the quantity actually delivered at destination after making temperature adjustment as set forth in Item 8. Carrier may require that transportation charges be prepaid at point of origin or paid at destination prior to release of products from Carrier's custody. Petroleum Products accepted for transportation shall be subject to a lien for all lawful charges. Payments not received by Carrier in accordance with invoice terms shall be subject to a late charge at an annual interest rate of 12 percent.

12. Liability of Carrier

While in possession of Petroleum Products for shipment, the Carrier shall not be liable for any loss thereof or damage thereto or delay caused by the acts of God, public enemy, civil disorder, quarantine, authority of law, strikes, riots, fire, floods, or act or default of shipper or from any other cause not due to the negligence of the Carrier whether similar or dissimilar to the causes herein enumerated. Any such loss or damage shall be apportioned to each shipment in the same proportion that such shipment, or part thereof, received and undelivered at the time such loss or damage occurs bears to the total of all shipments, or part thereof, then in the custody of the Carrier for transportation. Each shipper shall be entitled to receive only that portion of his shipment remaining after deducting his proportion, as so determined, of such loss or damage, and transportation charges shall be assessed only on the quantity delivered.

The Carrier will not be liable for discoloration, contamination, or deterioration of Petroleum Products transported, unless such discoloration, contamination, or deterioration results from negligence of the Carrier in movement or handling of the product through the facilities of the Carrier. In the event of such damage, each owner's share of the damaged product shall be in the same proportion as its share of the total quantity of shipments involved, and each such owner shall be allocated only its proportionate share of damaged product. The Carrier shall prepare and submit a statement to the owners showing the apportionment of the damaged product among the owners involved.

13. Claims, Time for Filing

Except where property is lost or damaged in transit by carelessness or negligence of the Carrier, claims for loss or damage must be made in writing to the Carrier within nine (9) months after delivery of the property or, in case of a failure to make delivery, then within nine (9) months after a reasonable time for delivery has elapsed. Suits for loss or damage shall be instituted only within two (2) years and one (1) day after delivery of the property or, in case of a failure to make delivery, then within two (2) years and one (1) day after a reasonable time for delivery has elapsed; provided, however, that where claims have been duly filed with the Carrier, suit must be brought within two (2) years and one (1) day after notice in writing is given by the Carrier to the claimant that the Carrier has disallowed the claim or any part or parts thereof specified in the notice. Where claims for loss or damage are not filed or suits are not instituted thereon in accordance with the foregoing provisions, such claims will not be paid and the Carrier will not be liable.

14. Use of Communication Facilities

Where Carrier maintains private communication facilities, transmission of messages incident to a shipment may be made by Carrier for the shipper without additional charge. Carrier, however, assumes no liability for non-delivery of messages, for error or delay in transmission, or for interruption of service.

15. Nominations

Petroleum Products will be accepted for transportation only on properly executed Tenders, as defined in Item 1.

- (a) Shippers desiring to tender Petroleum Products for transportation shall make in writing a separate Tender for each calendar month on or before the 15th day of the preceding month. Carrier is under no obligation to accept Petroleum Products for transportation in any month unless Shipper submits a nomination on or before the fifteenth (15th) day of the calendar month preceding the desired shipment date. If the fifteenth (15th) day of the month falls on a weekend or holiday, nominations are due on the last workday before the fifteenth (15th). A nomination must specify, for each shipment, the quantity, product grade, Origin, Destination and Shipper.
- (b) Petroleum Products shall be accepted for transportation at such time as Petroleum Products of the same specifications are currently being transported from point of Origin to a Destination or Destinations in accordance with schedules of shipments to be issued from time to time to each Shipper by the Carrier. Such schedules may be modified from time to time in the manner and to the extent reasonably desirable to facilitate the efficient and economical use and operation of the Carrier's facilities and to reasonably accommodate Shipper's needs for transportation. Any changes or modification to Shipper's monthly nominations should be completed at least fourteen (14) days before the scheduled entry date of product into the Carrier's facilities. If a change in nomination is not timely submitted, Carrier will handle in a manner to facilitate the efficient, economic use and operation of the Carrier's facilities and to reasonably accommodate Shipper's needs for transportation of product. Carrier will provide a pump date for a completed nomination a minimum of seven (7) days prior to the release date.
